

# **A SYSTEM AND METHOD FOR SERVICE DELIVERY PLATFORM IN AN IP CENTRIC DISTRIBUTED NEXT GENERATION NETWORK**

## **ABSTRACT**

5           A system and method for the proposed service delivery platform 210 to communicate  
with the network service provider 110, IP application service provider 170, and end-user 135  
is described. The method can include a plurality of functional components of the service  
delivery platform 210 that communicates with plurality of functional components of the  
network service provider 110, IP application service provider 170, and end user 135 devices.
